

PARAMETERS CONCERNING THE ASSIGNMENT OF CONTRIBUTIONS TO CLUBS' PROJECTS

Contribution assignments concerning clubs' activities will be determined within the limits of the total available budget and in accordance with some parameters and priorities.

Any activity or group of comparable activities gets a score based on the following parameters: first of all, clubs' proposals are to be divided into 3 categories called "*sede*", "*eventi*", "*interne*".

The category "***sede***" (location) includes any request concerning refurbishment and enhancement works of clubs' locations, with a special consideration for works carried out in freehold sites or those considered more urgent and necessary.

The category "***eventi***" (events) includes any activity carried out by the clubs within their local realities and any important representative activity (such as anniversaries, exhibitions, public celebrations, etc.) in the interest of people and institutions apart from clubs' associates. Initiatives involving institutions and referring to Trentino and Italy in a major way will be considered overriding.

The category "***interne***" (internal activities) includes Italian language courses (and other types) and any activity carried out by clubs mainly in favour of their own associates (banquets, assemblies, trips, celebrations, papers, etc.) As far as this kind of activities is concerned, initiatives promoting the knowledge of both Italian language and culture and the culture of Trentino are preferred.

In every category, the focus on young people is considered a positive value and a qualifying element.

The proposed projects included in these categories will be evaluated in accordance with about ten parameters (the parameters slightly change for every category).

The parameters concern:

- The level of self-financing capability by the club
- The characteristics of the club (size, geographical position, continuity, interaction with the headquarter in Trento, possible anniversaries, etc.)
- The characteristics of the initiatives (type, connection to emigration and Trentino, creativity and innovation, etc.)
- Other parameters (involvement of young people, network capability, etc.)

According to the available resources, a maximal limit is established every year in order to allow the highest number of clubs to benefit from the financing: for instance, 2013 maximal limit per club was 2.000,00€. In addition, a maximal contribution has been defined for every category.

Furthermore, the contribution received in the previous year will be taken into account: as a consequence, 2014 contribution will be established according to 2013 financing reduced at 50%.
